HASSAN ABDIKADIR

SOFTWARE ENGINEER • FULLSTACK MERN ARCHITECT • DATA ANALYST

Hargeisa, Somaliland | +252 63 6364115 | hasanabdikadir15@gmail.com | Portfolio: hassanabdikadir.dev | GitHub: github.com/HassanAbdikadir

EXECUTIVE SUMMARY

High-impact Software Engineer and Data Analyst with 3+ years of experience designing, building, and deploying production-grade FullStack MERN web platforms, microservices architectures, low-latency Socket.io real-time engines, and data analytics telemetry dashboards. Dedicated to clean code, robust backend security, and sleek user interfaces.

EDUCATION

Amoud University — Faculty of Computing & IT **(2020 — 2024)**

Bachelor of Science (B.Sc.) in Computer Science & Software Engineering — *Graduated with Distinction*

- **Relevant Coursework:** Software Engineering Principles, Data Structures & Algorithms, Database Management Systems (SQL & NoSQL), Web Systems Architecture, Data Science & Telemetry.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, TailwindCSS, Glassmorphism UI
Backend & API:	Node.js, Express.js, RESTful Architecture, JWT Authentication, Security Suite (Helmet, Rate Limiting)
Databases & Realtime:	MongoDB, Mongoose, SQL / PostgreSQL, Socket.io WebSocket, WebRTC, Redis Caching
Data & Intelligence:	Python, Pandas, NumPy, Chart.js, Data Visualization, OpenAI GPT-4 Integration
DevOps & Tools:	Git, GitHub, Docker, Linux Ops, Postman API Testing, CI/CD, Cloud Deployment (Vercel/Render)

PROJECTS & PROFESSIONAL EXPERIENCE

FullStack Academy Digital Education Platform | *Lead Architect & FullStack Developer* **(2024 — Present)**

- Built an enterprise-grade digital learning portal with MERN Stack featuring multi-role authentication (Student, Instructor, Admin).
- Engineered AI Technical Mock Interviewer integrated with OpenAI GPT-4 for automated student evaluation and real-time feedback.
- Implemented sub-30ms Socket.io multi-room chat communication and Redis pub/sub adapter for high scalability.

Data Analytics & Predictive Intelligence Dashboard | *Data Analyst & Solutions Engineer* **(2023 — 2024)**

- Designed interactive data telemetry dashboards rendering complex data streams with Chart.js and React.
- Automated ETL pipelines in Python (Pandas/NumPy) with MongoDB aggregation pipelines achieving 97.4% model accuracy.
- Delivered benchmark query throughput handling 2,400+ requests per second with custom downsampling filters.

E-Commerce Enterprise System & Real-Time Messaging Engine | *FullStack Developer* **(2022 — 2023)**

- Developed full-featured MERN store with Stripe payment gateway, MongoDB ACID transaction handling, and automated PDF invoice generation.
- Built scalable messaging backend with end-to-end payload validation, token authorization, and network failure re-syncing.

CERTIFICATIONS & LANGUAGES

- **Certifications:** FullStack MERN Architect Master (2024) | Professional Data Analytics (2023) | Node.js Microservices Engineering (2023)
- **Languages:** English (Fluent / Professional), Somali (Native)
